STRUCTURES

TRIDOME STRUCTURES

Architecturally inspired, sustainably built and designed for the future.

About us

At Tridome, we are not simply fabricators of outdoor structures. We are **design assist manufacturers**. Our team works hand in hand with architects, designers, and developers to translate vision into engineered form.

Our craft is rooted in timber innovation:

- **Freeform Glulam** for sculptural strength
- **MicroCLT** for warm, refined interiors
- **NLT** for modular adaptability
- **Composite roofing systems** for longevity and aesthetic choice
- **Advanced glazing**, hurricane rated when required, including curved options

Every Tridome project is **manufactured with precision, assembled with efficiency, and built to endure**. We create destinations where luxury and landscape are inseparable.

Why Choose Tridome

We deliver the ability to create suites that command premium nightly rates through architecture, manufacturing, and collaboration.

- **Design and Manufacturing Integration:** Early design support ensures details are achievable, buildable, and cost-controlled
- **Materials That Perform:** Timber systems with natural warmth and structural resilience
- **Luxury Positioning:** Not Glamping, but **Luxury Outdoor Hospitality**. Experiences that meet the standards of high-end resorts
- **Sustainability as Standard:** Low carbon sourcing, efficient prefabrication, long-life materials

Partnering with Tridome means bringing forward a **retreat that is timeless, modern, and market-ready**.

INVITING **YOU IN.**

Architecturally inspired, sustainably built and designed for the future.

Designing the Destination

Suites and Villas

Each suite integrates advanced glazing and roof systems, options include natural thatch, composite tiles/thatch, or traditional shingles, while featuring bespoke interior finishes.

- **Studio:** Intimate, private, perfect for couples
- **Signature Suite:** Intimacy of a studio, without sacrificing space
- **One Bedroom Plus Suite:** Scalable and flexible while maintaining a unified architectural language
- **Grand Villas:** Expansive layouts with hospitality-grade amenities

Suites and Villas

- **Innovative Design:** Our structures blend modern aesthetics with practical functionality, ensuring a seamless integration into any natural setting.
- **Innovative Timber Design:** Freeform glulam beams and modular MicroCLT construction
- **Hospitality Grade Durability:** Engineered to exceed global building codes and hurricane-rated when requested
- **Luxury Materials:** Composite thatch, composite tile, advanced glazing, low-voltage lighting
- **Efficient Installation:** Modular prefabrication for faster returns
- **Curated Interiors:** Spa-level bathrooms, custom cabinetry, warm timber finishes
- **Sustainable:** We use SPF and SPF-S from responsibly managed forests, keeping our supply chain rooted in the Northeast. By sourcing locally, we reduce transportation impacts, strengthen regional forestry networks, and ensure every structure carries a lighter environmental footprint.

Additional Details

Finishing Details

Delight your guests with an architectural experience that blends nature, comfort, and refinement — tailored to your brand and your vision. At Tridome, we recognize that no two destinations are alike. That is why we offer a comprehensive range of customizable options for your suites. Here is a glimpse into what you can select:

Insulation for Every Climate:

Every suite is engineered for year-round comfort with layered insulation systems. Options include Blueskin barriers for air and moisture protection, Rockwool Comfort Board for exterior thermal stability, and high-performance interior insulation for energy efficiency. The result is a quiet, resilient, and comfortable retreat that meets the standards of luxury outdoor hospitality.

Interior Finishes:

Whether you prefer an open layout, refined wood partitions, built-in furniture, or a fully integrated kitchenette, every interior can be tailored to reflect your brand identity and exceed guest expectations. High-end bathrooms with spa-level detailing complete the experience.

Roofing Choices:

Select from natural thatch, composite thatch, or composite tile systems to achieve the aesthetic and performance your retreat demands. Each option delivers durability while complementing the architectural language of the suite.

Extra Features:

Enhance the retreat with outdoor cold plunges, herb walls, freestanding glulam swings, and soft uplighting that transforms the landscape into an inviting extension of the suite.

Wall Styles:

Define each suite with architectural precision. Options include freeform CLT for sculptural expression, freeform glulam for structural artistry, or MicroCLT partition walls for refined interiors. MicroCLT flooring brings warmth and durability underfoot, completing the luxury experience.

Glazing:

Frame the landscape with glazing engineered for performance and beauty. Options include floor-to-ceiling glass, hurricane-rated assemblies, and curved glazing for dramatic impact. Each system integrates seamlessly with timber structure, delivering uninterrupted views and natural light with lasting durability.

Guiding Principles

Our EPSP framework guides every project, ensuring a positive impact on the environment, people, and place while shaping spaces that inspire, connect, and endure.

ENVIRONMENTAL

Our structures are manufactured with a deep respect for place. From responsibly sourced timber to energy-efficient assemblies, every decision reduces impact while enhancing harmony with the natural surroundings. The result is architecture that supports both ecological balance and long-term resilience.

PSYCHOLOGICAL

Spaces shape how people feel. With natural light, warm timber finishes, and a seamless connection to the landscape, our environments encourage calm, clarity, and inspiration. Each retreat becomes more than a stay — it is an opportunity for renewal.

SOCIAL

Connection takes many forms. Whether through shared terraces and gathering spaces or quiet moments within a private suite, our designs foster meaningful interactions with others, family, and oneself. Hospitality becomes a framework for relationships and memory-making.

PHYSICAL

Every structure balances rest and vitality. Proportions, materials, and climate-responsive systems work together to restore the body, invite activity, and deliver comfort. Guests experience both energy and ease, immersed in the physical well-being of a retreat shaped by design and craft.

Will you follow the well-worn
path, or pioneer it?

TRIDOME

Our purpose is to create vibrant
environments that nurture people,
communities, and the planet.
